

Cours 2018-2019 "Les séismes intermédiaires et profonds"
Barbara Romanowicz (Chaire de Physique de l'Intérieur de la Terre)

Bibliographie Cours no 4 - Expériences de laboratoire

Chernak, L. and G. Hirth (2010) Syndeformational antigorite dehydration produces stable slip, *Geology*, 39, 847-850

Dobson, D. P., P. C. Meredith and S. A. Boon (2002) Simulation of Subduction Zone Seismicity by Dehydration of Serpentine, *science* 298, 1407-1410.

Ferrand, T. P. , N. Hilairret, S. Incel.. et al. (2017) Dehydration-driven stress transfer triggers intermediate-depth earthquakes, *Nat. Comm.* 81:15247.

Gasc, J. , A. Schubnel et al. (2011) Simultaneous acoustic emissions monitoring and synchrotron X-ray diffraction at high pressure and temperature: Calibration and application to serpentinite dehydration, *Phys. Earth Planet Inter.*, 189, 121-133.

Giardini D and Lundgren P (1995) The June 9 Bolivia and March 9 Fiji deep earthquakes of 1994: II. Geodynamic implications. *Geophysical Research Letters* 22: 2281–2284

Green, H. W., C. H. Scholz, et al. (1992) Acoustic emissions produced by anticrack faulting during the olivine-spinel transformation, *Geophys. Res. Lett.*, 19, 789-792.

Jung, H. ,H. W. Green and L. F. Dobrzinetskaya (2004) Intermediate-depth earthquake faulting by dehydration embrittlement with negative volume change, *Nature*, 428, 545-549.

Jung, H., Y. Fei, P. G. Silver and H. W. Green (2009) Frictional sliding in serpentine at very high pressure, *Earth Planet Sci Lett.*, 277, 273-279/

Meade, C. and R. Jeanloz (1989)Acoustic emissions and shear instabilities during phase transformations in Si and Ge at ultrahigh pressures, *Nature*, 339, 616-618

Meade, C. and R. Jeanloz (1991) Deep-focus earthquakes and recycling of water into the Earth's mantle. *Science* 252, 68–72.

Raleigh. C. B. and M S. Paterson (1965) Experimental deformation of serpentinite and its tectonic implications, *J. Geophys. Res.*, 70, 3965- 3985.

Wang Y., L. Zhu, F. Shi, A. Schubnel et al. (2017) A laboratory nanoseismological study on deep-focus earthquake micromechanics, *Science Advances*, 3: e1601896
