

Colloque de séminaires organisé par

CHAIRE ÉVOLUTION DU CLIMAT ET DE L'OCÉAN

M. Edouard BARD, Professeur

Année académique 2017-2018

Le Climat des deux derniers millénaires Climate of the last two millennia

Vendredi 15 juin 2018
9h00-18h45

- 09h00 - 10h00 **Edouard BARD** (Collège de France & CEREGE, Aix-en-Provence)
Introduction and perspective on climate forcings and proxies
-
- 10h00 - 11h00 **Jan ESPER** (Johannes Gutenberg University, Mainz)
Millennial-length large-scale temperature reconstructions from tree-rings: knowns and unknowns
-
- 11h00 - 12h00 **Elena XOPLAKI** (Justus Liebig University, Giessen)
Climate impacts and societal resilience in the Mediterranean of the last millennium; the case of medieval Byzantium
-
- 12h00 Pause déjeuner
-
- 14h00 - 15h00 **Gerald HAUG** (Max Planck Institute for Chemistry, Mainz and Earth Sciences Dept., ETH Zürich)
The role of tropical climate dynamics on the decline of civilizations
-
- 15h00 - 16h00 **Jürg LUTERBACHER** (Justus Liebig University, Giessen)
New evidence on Asian temperature and hydroclimatic variability over the past two millennia
-
- 16h00 Pause café
-
- 16h30 - 17h30 **Myriam KHODRI** (LOCEAN IRD/IPSL Sorbonne University, Paris)
Modelling and understanding the influence of external forcings on climate variability and change over the past two millennia
-
- 17h30 - 18h30 **Johann JUNGCLAUS** (Max Planck Institute for Meteorology, Hamburg)
The role of the ocean circulation in shaping European climate variations over the last millennium
-
- 18h30 Discussion générale et conclusion
