For centuries, the Collège de France has always striven to organize lectures free of charge on the latest research for any interested audience, facilitate the dissemination of knowledge, facilitate the emergence of new disciplines and a multidisciplinary approach to top-level research, and contribute to the international image of France in all areas of research and culture. In a constantly changing world confronted with an explosion of knowledge and the proliferation of information, new communication techniques as well as the major social and professional changes that follow, the task of the Collège de France has become even more crucial today.

This program presents all of the lectures and seminars to be held in Paris, the rest of France, and abroad, delivered by the professors at the Collège de France throughout the year. Our website is continually updated with information on guest professors from abroad as well as conferences.
