

CHAIRE ONCOLOGIE CELLULAIRE ET MOLÉCULAIRE

Année académique 2017-2018

Hugues DE THÉ
Professeur

Master transcriptional regulators and cancer

Jeudi 24 mai 2018 de 9h à 17h
Amphithéâtre Guillaume Budé

- 9h00-9h40 **Transcriptional programs and therapeutic targets in MYC-driven lymphoma**
Bruno AMATI - European Institute of Oncology
- 9h40-10h20 **The evil side of gene regulation in acute myeloid leukemia**
H.R. DELWEL - Erasmus MC
- 10h40-11h20 **Runx1 in haematopoietic development, reprogramming and cancers**
Georges LACAUD - Cancer Research UK Manchester Institute
- 11h20-12h00 **BCL6 is a master regulator of oncogenic transcriptional programming**
Ari MELNICK - Weill Cornell Medical College
- 14h00-14h40 **Myelo-erythroid progenitors and leukemias**
Claus NERLOV - MRC Weatherall Institute of Molecular Medicine, University of Oxford
- 14h40-15h20 **Deregulated MITF sumoylation: a route to melanoma**
Corinne BERTOLOTTO - Université de Nice
- 15h40-16h20 **Cell identity and plasticity in pediatric cancers**
Olivier DELATTRE - Institut Curie
- 16h20-17h00 **WT1- from genetic disorders to tissue development, homeostasis and repair**
Nick HASTIE - The Institute of Genetics and Molecular Medicine, Edinburgh
