

BIBLIOGRAPHY ORBAN Guy A.

BOOKS

Author

1. ORBAN G.A. *Neuronal Operations in the Visual Cortex. Studies of Brain Function Vol. 11*, H.B. Barlow, T.H. Bullock, E. Florey, O.-J. Grüsser & A. Peters (Eds.). Springer-Verlag: Berlin, 1984, 367 p.

Editor

2. ORBAN G.A., SINGER W. and BERNSEN N.O. (Eds.) *Cognitive Neuroscience: Research Directions in Cognitive Science - European Perspectives Vol. 4.*, Lawrence Erlbaum: Hove (U.K.), 1991, 192 p.
3. ORBAN G.A. and NAGEL H.H. (Eds.) *Artificial and Biological Vision Systems.* Springer-Verlag: Heidelberg, 1992, 389 p.

PAPERS

1. ORBAN G., WISSAERT R. and CALLENS M. Influence of brain stem oculomotor area stimulation on single unit activity in the visual cortex, mathematical analysis of results. *Brain Res.*, 1970, 17: 351-354.
2. ORBAN G., VANDENBUSSCHE E. and CALLENS M. Electrophysiological evidence for the existence of connections between the brain stem oculomotor areas and the visual system in the cat. *Brain Res.*, 1972, 41: 225-229.
3. ORBAN G., DUYSSENS J. and CALLENS M. Movement perception during voluntary saccadic eye movements. *Vision Res.*, 1973, 13: 1343-1353.
4. ORBAN G., COLLE J. and CALLENS M. La stabilité de la perception spatiale pendant les saccades oculaires. *Arch. ital. Biol.*, 1973, 111: 441-450.
5. ORBAN G.A., CALLENS M. and COLLE J. Unit responses to moving stimuli in area 18 of the cat. *Brain Res.*, 1975, 90: 205-219.
6. ORBAN G.A. Area 18 of the cat: the first step in processing visual movement information. *Perception*, 1977, 6: 501-511.
7. ORBAN G.A. and CALLENS M. Receptive field types of area 18 neurones in the cat. *Exp. Brain Res.*, 1977, 30: 107-123.
8. ORBAN G.A. and CALLENS M. Influence of movement parameters on area 18 neurones in the cat. *Exp. Brain Res.*, 1977, 30: 125-140.
9. KATO H., BISHOP P.O. and ORBAN G.A. Hypercomplex and the simple/complex cell classifications in cat striate cortex. *J. Neurophysiol.*, 1978, 41: 1071-1095.
10. ORBAN G.A., KENNEDY H. and MAES H. Influence of eccentricity on velocity characteristics of area 18 neurones in the cat. *Brain Res.*, 1978, 159: 391-395.
11. ORBAN G.A., KENNEDY H., MAES H. and AMBLARD B. Cats reared in stroboscopic illumination: velocity characteristics of area 18 neurons. *Arch. ital. Biol.*, 1978, 116: 413-419.
12. D'HOLLANDER E. and ORBAN G.A. Spike recognition and on-line classification by unsupervised learning system. *IEEE Trans. Biomed. Eng.*, 1979, 26: 279-284.
13. ORBAN G.A., KATO H. and BISHOP P.O. End-zone region in receptive fields of hypercomplex and other striate neurons in the cat. *J. Neurophysiol.*, 1979, 42: 818-832.
14. ORBAN G.A., KATO H. and BISHOP P.O. Dimensions and properties of end-zone inhibitory areas in receptive fields of hypercomplex cells in cat striate cortex. *J. Neurophysiol.*, 1979, 42: 833-849.

15. ORBAN G.A., KENNEDY H. and MAES H. Functional changes across the 17-18 border in the cat. *Exp. Brain Res.*, 1980, 39: 177-186.
16. BISHOP P.O., KATO H. and ORBAN G.A. Direction-selective cells in complex family in cat striate cortex. *J. Neurophysiol.*, 1980, 43: 1266-1283.
17. MAES H. and ORBAN G.A. STIMUL: stimulus control and multihistogram analysis of single neurone recordings. *Med. & Biol. Eng. & Comput.*, 1980, 18: 569-572.
18. ORBAN G.A. and KENNEDY H. The influence of eccentricity on receptive field types and orientation selectivity in areas 17 and 18 of the cat. *Brain Res.*, 1981, 208: 203-208.
19. ORBAN G.A., KENNEDY H. and MAES H. Response to movement of neurons in areas 17 and 18 of the cat: velocity sensitivity. *J. Neurophysiol.*, 1981, 45: 1043-1058.
20. ORBAN G.A., KENNEDY H. and MAES H. Response to movement of neurons in areas 17 and 18 of the cat: direction selectivity. *J. Neurophysiol.*, 1981, 45: 1059-1073.
21. DUYSSENS J. and ORBAN G.A. Is stimulus movement of particular importance in the functioning of cat visual cortex ? *Brain Res.*, 1981, 220: 184-187.
22. van der GLAS H.W., ORBAN G.A., JORIS Ph.X. and VERHOEVEN F.J. Direction selectivity in human visual perception, investigated with low contrast gratings. *Acta Psychol.*, 1981, 48: 15-23.
23. ORBAN G.A., KENNEDY H. and MAES H. Velocity sensitivity of areas 17 and 18 of the cat. *Acta Psychol.*, 1981, 48: 303-309.
24. KATO H., BISHOP P.O. and ORBAN G.A. Binocular interaction on monocularly discharged lateral geniculate and striate neurons in the cat. *J. Neurophysiol.*, 1981, 46: 932-951.
