

## INTERNATIONAL COOPERATION UNDER THE HUMAN RIGHT TO SCIENCE

*'A path-breaking collection that reinforces the value of science as a transnational good at a time when, in the face of a polycrisis, governments increasingly reassert their sovereignty rather than their duty to cooperate in the areas of science and technology.'*

Andrea Boggio, Bryant University, USA

This book explores the importance of international cooperation in realising the 'human right to science' as enshrined in Article 15(1)(b) of the International Covenant on Economic, Social and Cultural Rights (ICESCR). The need to reawaken this right has been acknowledged in recent scholarship. However, the role of international scientific cooperation for the effective realisation of the right has been, to date, overlooked.

International scientific cooperation is not only a core element of the human right to science, as recognised explicitly by Article 15(4) ICESCR, but also a concern in many other regimes of international law, such as climate change, biodiversity, AI or health law. In this book, experts in international human rights law explore the grounds, subjects, objects and the contents of the duty and responsibility of international cooperation under the human right to science. Chapters address a variety of issues ranging from the universality of science and respect for local knowledge, scientific sovereignty and self-determination, and the equitable access to and sharing of scientific benefits.

*International Cooperation under the Human Right to Science* is a crucial read for scholars and students of international law, particularly those in the field of international human rights law. Practitioners, including inside organisations such as UNESCO, WHO, WTO, WIPO or the IPCC, will also greatly benefit from the book's necessary insights.

**Samantha Besson** is Professor of Public International Law and European Law in the Faculty of Law at the University of Fribourg, Switzerland and Holder of the Chair 'International Law of Institutions' at Collège de France and **Katja Achermann** is SNF Postdoctoral Researcher in the Faculty of Law at the University of Fribourg, Switzerland.
